

PRESS RELEASE

April 2009

BARBECUING IN 1, 2, 3

New: the Collosea charcoal barbecue from barbecook

With the sunny summer months ahead of us, we can again look forward to the pleasures of outdoor cooking. What is more fun than a nice barbecue? A barbecue without worries! That's exactly what Belgian barbecue manufacturer barbecook guarantees with its QuickStart® charcoal barbecues.

EASY TO LIGHT

The barbecook charcoal barbecues are equipped with the unique QuickStart® lighting system. You do not need any dangerous lighting products, and after just fifteen minutes you can start grilling. Lighting the barbecue is accomplished in three simple steps: fold three double sheets of newspaper into a torch-like shape and insert them into the lighting tube. Pour some charcoal into the burner box and then light the newspaper using a long match. After fifteen minutes your barbecook barbecue is ready to grill, without fuss or bother.

SAFE

For added safety during barbecuing, you can fill the base of the barbecook charcoal barbecue with water. This not only provides extra stability, but also extinguishes burnt ashes. The water will moreover extinguish the charcoal, should the barbecue still fall over. After barbecuing, you can rinse out the charcoal residues in the base with a little water. Then you remove the base, and pour out the ashes with the water... all neat and tidy.

NEW FOR 2009: COLLOSEA INOX

For 2009, barbecook has expanded its range of charcoal barbecues with the Collosea Inox. This stainless steel charcoal barbecue is suitable for as many as twelve persons. The current QuickStart® product line is maintained, with models for four to ten persons, in stainless steel or porcelain enamelled steel. Let summer begin!
